PROFESSIONAL SUMMARY

Motivated Full Stack Developer experienced in building scalable, user-friendly, AI-enhanced applications using React.js, Node.js, and modern frameworks. I'm especially interested in Web3, DeFi, and AI-driven applications, and I've built everything from Chrome extensions to on-chain tools and dApps. I like shipping quickly, iterating often, and learning in public. When I'm not coding, I'm usually exploring new crypto protocols, breaking down technical ideas, or engaging with the builder community on X.

SKILLS

- **Frontend**: React.js, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Chrome APIs
- **Backend**: Node.js, Express.js, RESTful APIs, GraphQL
- **DevOps/Tools**: Git, GitHub, Vercel, Postman, Docker, Kubernetes, Visual Studio Code, WordPress, Linux, Figma
- **Databases**: MongoDB, Firebase, Supabase, PostgreSQL, SQLite
- **Blockchain/Web3**: Ether.js, Smart Contract Development, Wallet Integration, wagmi

WORK EXPERIENCE

Freelance Web Developer
Self-employed   **2023 - Present**
- Built full-stack web applications using React, Next.js, Node.js, Express.js, MongoDB, Tailwind CSS and Supabase.
- Shipped SaaS tools, Chrome extensions, and crypto-native applications with a focus on clean UI and performance.
- Integrated Web3 features including wallet connections and on-chain interactions.
- Used AI-assisted workflows (GitHub Copilot) to iterate quickly while maintaining code quality.

Open Source & Hackathons
Independent
- Contributed to open-source projects and shared codebases, collaborating with other developers.
- Built production-ready prototypes in hackathon environments, including Web3 and multisig tooling.
- Comfortable reviewing PRs, iterating on feedback, and working in fast-moving teams.

PROJECTS

XeetViewer
- A lightweight browser extension that surfaces Xeet (xeet.ai) scores directly on 𝕏 profile pages and in the timeline.
- Built using Javascript, Chrome APIs, CSS3, and HTML5.

Personal Portfolio Website
- Developed using React.js, Next.js, TypeScript, and Tailwind CSS to showcase professional projects and contact info.

Pomodoro Timer Extension
- A simple, customizable Pomodoro timer Chrome extension to help you focus and manage your work/break cycles.
- Built using Javascript, Chrome APIs, CSS3, and HTML5.

Linea Airdrop Claim DApp
- A decentralized application (DApp) for claiming Linea airdrop tokens.
- Built using RainbowKit, wagmi, and Next.js.

EDUCATION

Scrimba Full-Stack Developer Pathway
- Built a strong foundation in HTML, CSS, and JavaScript through hands-on projects.
- Learned modern frontend and backend concepts by building and shipping small apps. Developed practical skills in version control, deployment, and debugging.
